

Instruction

Look at each picture carefully.

oWhat's happening in the scene? Is the Earth happy or sad? Are the people or animals helping or hurting the planet?

Color the pages with your favorite colors.

- o Use bright, happy colors for healthy Earth scenes, and darker or warmer colors (like red, orange, and brown) for hot, polluted scenes.

Talk about what you see.

- o Ask a parent, teacher, or friend:

oWhy is the Earth sad or sweating?

oWhat can we do to stop pollution or plant more trees?

Learn while you color!

oThese pages show things like melting ice, recycling, planting trees, and using clean energy—all important ways to protect our Earth.

Share your colored pages.

oHang them up at home or school to remind everyone: We Can Help the Earth!
